Network Rail update

Claire Youdell

Commercial Scheme Sponsor
Network Rail

Victoria Arch widening scheme: rail infrastructure update

- Network Rail is required to maintain the bridge and had previously planned to strengthen the existing bridge during years 2021/2022.
- This would have been a temporary measure and the bridge would need to be replaced within the next 20 years.
- Working collaboratively with Woking Borough Council will help to deliver much needed improvements to the infrastructure.

Victoria Arch widening scheme: rail infrastructure update

Network Rail is responsible for:

- the bridge design
- the construction work associated with the demolition of the existing structure
- the installation of the new bridge box culvert, abutments and deck.

Victoria Arch widening scheme: rail infrastructure update

Network Rail's contractor, Osbornes, will deliver the work over the course of about 18 months. This will include:

- removing the old bridge
- widening the width of the bridge
- replacing the bridge deck
- removing and replacing most of the tracks
- building the box culverts for pedestrian and cycle access.
